OBJECTIVE

Motivated Information Technology student (expected 2027) with hands-on experience building and deploying full-stack web applications using Node.js, React.js, Express.js, and MongoDB. Proficient in REST API development, authentication (JWT), and cloud deployment (Render). Seeking an entry-level Software Engineer or Web Developer role to contribute to impactful products.

TECHNICAL SKILLS

Languages: Java, C, Python (Basic)

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, Express.js, REST API Development

Databases: MySQL, MongoDB

Authentication & Security: JWT, bcrypt, OTP Email Verification

Deployment & Tools: Render, GitHub, VS Code, IntelliJ IDEA

EDUCATION

Gayatri Vidya Parishad College of Engineering for Women

2023 – 2027

B.Tech in Information Technology | CGPA: 8.29

Visakhapatnam, Andhra Pradesh

Pragati Junior College

2021 – 2023

Intermediate (10+2) | Percentage: 93.8%

Prathipadu, Andhra Pradesh

Srividya High School

2020 – 2021

SSC | CGPA: 10

Yeleswaram, Andhra Pradesh

PROJECTS

Arjun Store – Hyperlocal Grocery Delivery Web Application [\[GitHub\]](#) [\[Live Demo\]](#)

- Built a full-stack hyperlocal grocery delivery web app using Node.js, Express.js, MongoDB Atlas, and JavaScript, deployed on Render as an alternative to platforms like Blinkit/BigBasket that don't serve tier-3 areas.
- Implemented JWT-based authentication, bcrypt password hashing, and 10+ RESTful API endpoints for product listing, cart, and order management.
- Integrated OTP-based email verification via Brevo SMTP (port 587) after diagnosing and resolving Render free-tier outbound port-blocking; configured UptimeRobot for uptime monitoring.
- Added real-time frontend product search and submitted XML sitemap to Google Search Console for SEO indexing.

Journal Formatter – AI-Powered Writing Assistant (In Progress) [\[GitHub\]](#)

- Developing a full-stack AI writing assistant using React.js (Vite) and Express.js, integrated with the Google Gemini API for journal text formatting and enhancement; built during Lumora Systems internship.
- Built a component-based React frontend and Node.js/Express backend with CORS configuration and environment-based PORT binding for local development.
- Diagnosed and resolved critical bugs including PDF/image upload failures, DOCX output formatting restrictions, and a JSON parsing error caused by a corrupted local database file, ensuring stable core functionality.

INTERSHIP

Lumora Systems Pvt. Ltd.

May 2026

Software Development Intern

Offline – Visakhapatnam

- Worked on an industry-level AI web application project under mentorship, gaining hands-on experience in full-stack development, API integration, and agile-style task delivery.
- Collaborated with the development team to plan, build, and deploy a production-ready application; learned best practices in code organisation, environment configuration, and cloud deployment.
- Participated in code reviews and daily stand-ups with the team, strengthening communication and collaborative development practices.

Infosys Springboard – AICTE Virtual Internship

2024

Data Science with Python Intern

Remote

- Built an Accident Analysis System dashboard using Python, Pandas, NumPy, Matplotlib, and Streamlit, deployed on Streamlit Cloud with interactive visualisations and EDA insights.
- Completed structured modules in data cleaning, exploratory data analysis (EDA), and data visualisation workflows on real-world datasets.

CERTIFICATIONS

- NPTEL Programming in Java (Skill India) – Score: 73%
- AICTE Virtual Internship – Full Stack Web Developer
- Future Interns – Web Development Fundamentals
