OBJECTIVE

Aspiring Software Engineer with a strong foundation in Java, C, data structures, and core programming concepts. Experienced in writing efficient code, understanding algorithmic logic, and building basic web pages using HTML. Completed academic projects and a data science internship using Python, gaining exposure to problem-solving, data handling, and analytical thinking. Seeking an entry-level role in a technology-driven organization to apply my skills, learn new technologies, and grow as a professional developer..

TECHNICAL-SKILLS

Programming Languages : Java,C.

Front-End Technologies : HTML, CSS, JavaScript.

Data : Python, Pandas, Numpy, Matplotlib.

Analysis : Database(MySql)

Solving Skills

EDUCATION

GAYATRI VIDYA PARISHAD COLLEGE OF ENGINEERING FOR WOMEN 2023 - 2027

B.Tech in Information Technology

CGPA:8.30

PRAGATI JUNIOR COLLEGE - PRATHIPADU

2021 - 2023

Intermediate (10+2) with 93.8%

SRIVIDYA HIGH SCHOOL - YELESWARAM

2021

Class with 10 CGPA

PROJECTS

RevCart Containerized Deployment on AWS

- Extended the RevCart micro services grocery delivery application by implementing containerization, cloud deployment, and DevOps automation.
- Deployed the full-stack application in a real-world AWS environment with CI/CD pipelines and secure production configurations.

Roles & Responsibilities:

- Packaged the complete application into deployable units and prepared it for production-level execution.
- Deployed the application in a secure live environment with proper server configuration and request routing.
- Connected the application to managed databases to support reliable and scalable data storage.
- Enabled automated deployment, load distribution, and scaling to ensure high availability and smooth application updates.

Accident Analysis System

- Analyzed real-world accident datasets to identify trends, risk factors, and accident-prone conditions
- Performed data Cleaning, preprocessing, and exploratory data Analysis using python.
- Visualized accident patterns based on time, location, and severity to extract meaningful insights.
- Built interactive dashboards and charts using Matplotlib and Seaborn for clear data interpretation.
- Applied statistical techniques to detect correlations and predict high-risk accident zones.
- Derived data-driven conclusions and recommendations to support road safety improvements and decision-making.

INTERNSHIP

AICTE Internship -Data Science (Python)

- Gained hands on Experience in data Analysis, preprocessing and the data Visualization

Future Interns-Web Development

- Developed web Development and problem Solving Skills through hands on project
